
Environmental Protection Law and Regulation Compliance Review for Factory Registration

1. The application form of factory registration, alteration of registered factory profile, company establishment and alteration of company profile. (including the application form issued by the Economic Development Bureau)
2. Product manufacturing process: Describe, in detail, the manufacturing (including processing) process from raw materials to products through machinery and facilities (including the data or description on exhaust emissions, wastewater discharge, and waste production).
3. Machinery arrangement drawing: Please draw it accurately.
4. Approval of wastewater pipeline connection in industrial parks: Approval documents for wastewater pipeline connection issued by industrial parks shall be attached if the factory is located in the Xinying Industrial Park, Liuying Technology Industrial Park, Guantian Industrial park, Yongkang Industrial Park, Yongkang Technology Industrial Park, Tainan Science-based Industrial Park, LCD TV Park (Tree Valley Park), Tainan Technology Industrial Park, or Anping Industrial park.
5. Relevant information of factory-occupied area: Please attach the following documents. (The applicant should attach the lease of land if the factory is located in the Tainan Science-based Industrial Park.)
 - (1) Calculation sheet of factory site area (including the area recorded in the land registered document and the detailed list of actual land area applied for use permission)
 - (2) Land registered document
6. If the factory site area reaches five hectares, please attach a verification document regarding whether or not the factory is located on urban land.
7. Provide the following documents if the area for factory/company expansion reaches one hectare:
 - (1) A verification document regarding whether or not the factory is located in a specific agricultural area under the farmland re-zoning program (Competent authorities: Land Administration Bureau or Agriculture Bureau, Tainan City Government)
 - (2) If the factory is in a specific agricultural area, please provide the verification document for use alteration issued by the agricultural authorities (Agriculture Bureau of Tainan City Government).
8. To apply for alteration, the applicant should provide raw material, machinery, facility, and product comparison tables with information of raw material consumption, production, and electricity capacity; in addition, please attach photocopies of the factory registration certificate or the letter of company establishment permission.
9. If the factory site is located in the administrative district listed in the Table of Environmental Sensitive Regions, the applicant should inquire the competent authorities of the environmental sensitive area within that district as to whether or not the factory site is in their jurisdiction, and attach a location verification document issued by the authorities so as to determine whether or not an environmental impact assessment should be implemented. (Telephone number for inquiry: 06-2686751 ext. 324)
10. If the factory involves a stationary pollution source designated and announced by the Environmental Protection Administration (EPA), the applicant shall submit an air pollution control plan before establishment or alteration. The applicant shall acquire approval from the competent authorities and then attach a photocopy of the permit. (Telephone number for inquiry: 06-2686751 ext. 268)
11. If the factory is one of the businesses designated and announced by the EPA, the applicant should submit a business waste disposal plan before establishment or alteration. Please acquire approval from the competent authorities and then attach a photocopy of the permit. For an alteration case from a waste reuse entity, the applicant should attach the approved waste reuse registration checklist or the permit of waste reuse. (Telephone number for inquiry: 06-6572813 ext. 513)
12. If the factory is one of the businesses designated and announced by the EPA, the applicant should submit a soil pollution assessment, investigation, and testing report of its occupied land before establishment, alteration or closing down. Please acquire approval from the competent authorities, and then attach a photocopy of the permit. (Telephone number for inquiry: 06-2686751 ext. 336)
13. If the type, scope and scale of the factory fall within the classification announced by the EPA, the applicant shall submit a water pollution control plan in advance, and should follow the procedure prescribed in Appendix 5* to acquire approval from the competent authorities and then attach a photocopy of the permit. (Telephone number for inquiry: 06-6572813 ext. 320)

14. For the Danei, Liujia, Guantian, Dongshan, Nanxi, Nanhua, and Baihe regions, any water pollution act is prohibited within a certain distance to water head conservation areas or drinking water intakes. (Telephone number for inquiry: 06-6572813 ext. 332)
15. If the toxic chemicals announced by the EPA are involved in the operation (manufacturing, storage, etc.) of the factory, please conduct a registration at the Water Quality and Toxic Substance Management Section of the Bureau (permit) for follow-up inspection. Please acquire approval from the competent authorities. (Telephone number for inquiry: 06-6572813 ext. 314)
16. If the factory is located in the Liuying Technology Industrial Park, Yongkang Technology Industrial Park, or Tree Valley Park, the applicant should attach the total pollutant amount control table and approval letter issued by the industrial park authorities based on the content of this application form.
17. For factory registration related with environmental protection laws and regulations, please contact the one-stop window at 06-2686751 ext. 323.
